Such a secret formula is responsible for the wide popularity and enormous sales of Milani's French Dressing. For Milani's French Dressing is the prized formula of a great Italian chef, Luigt Milani, who has had the honor of preparing food for two of our presidents-Roosevelt and Taft.

But Mr. Milani did not originate this recipe; it has been a secret of the Milani family for more than eighty years; and this same French Dressing had made the hostelry of his father a Mecca for travelers while he was still a boy in that far-away Tuscany home.

Milani's is not an ordinary French Dressing. If it were, its sale would not have spread to every part and every neighborhood of Chicago in the short space of weeks.

There is something about Milani's French Dressing that is not supplied by any other; an appetite-provoking after-tang that others just do not have. The reason is simple. Milani's has not been commercialized to a point where its manufacture is merely factory routine of producing in quantity. Every bottle, every ounce of Milani's French Dressing is blended by the master — Milani himself — for he alone holds the secret.

Milani's French Dressing was the original French Dressing to appear on the market, and it still remains the only one that is truly a French Dressing, for it is the only one that does not contain some admixture of eggs, mayonnaise, or other ingredients not properly a part of real French Dressing.

That is why we can say there is only one French Dressing on the market; only one that serves equally as well as a sauce for meat, game and fish as it does for any form of salad; only one that has a universal appeal to the male members of the family; only one that is prepared by a real chef who knows the exacting taste of the connoisseur - and that's Milani's.

You will find Milani's French Salad Dressing at your dealer's, but you should ask for it by name and look at the label to be sure you are getting the genuine Milani's, then you'll not be disappointed.

Any product that could make such an instantaneous success as Milani's French Dressing would very naturally have many imitators and Milani's is no exception - even the Milani bottle has been copied. We mention this only to help those who want Milani's to get Milani's - for it's Milani's you'll want once you have tried it.

### MURDER, RAPE, AND THE RODEO.

The Chicago rodeo for next month reveals it opposition a number of active organizations whose purpose is to keep the steer from getting roped and tied or buildogged and bumped. The Chicago Association of Commerce, which is promoting the exhibition, says it will be a humane rodeo, but that does not satisfy the activities against it.

We have published the protest of the Lathan Foundation for Humane Education, headquarters Oakland, Cal. There seems to be an Anti-Rodeo ociation here in Chicago. The Latham Foundation has other activities, but the local organization seems to be exclusively to prevent rodeos. We have received documents in protest from the National Animal Humane association of Albany New York. Also from the Leeds Rodeo Protest mittee, 4 Queen's square, Leeds, England, and the National Equine Defense league, 27 Beacons field road, New Southgate, London N. (The English are not yet concerned with our particular rodeo. Their protests are used by American societies.)

It has become a matter of considerable national portance that steers shall not be bumped in Chicago next month. ### THE GERMAN REPLY ON SECURITY.

The German reply to the French-British note security cannot but make a strong and most favorable impression on world opinion. We hope and believe it will be met in the same spirit, a spirit essential to any substantial progress toward an agreement between France and Germany. All of the comment of the German reply is reasonable and necessary to elicit a clearer and more concrete statement of views by the French and British governments and thus opens the way to practical nego-

chlorosis is a form of anemia that is almost peculiar to women. The subject is pale, white with a greenish tings, is soft and flabby, is shortwinded and has clarification of the French position on modification of the treaties of peace. There can be no real stabilization of Europe on the basis of the treaties of Versailles and St. Germain. We are confident that French intelligence recognizes this, though official policy may not be ready to concede it. If there is to be peace rather than war, the German government is entirely right in pointing out that a government is entirely right in pointing out that a pact of security should not be interpreted to "exclude for all future time the possibility of adapting existing treaties at the proper time to changed circumstances by way of peaceful agreement." In fact, as the reply notes, "even the covenant of the league allows such necessities." On the other hand, the German government disclaims the intention to make a security pact dependent upon the immediate modification of treaty provisions now in force regarding occupation of German territory.

This is certainly a reasonable position, essentially pacific in principle. A security pact which of a leg with a garter, or a head with ring, or a leg with a garter, or a head with

### How to Keep Well. \*\*\* By Dr. W.A. Evans ...

Questions pertinent to hygiene, sanitation, and prevention of disease, if matters of general interest, will be answered in this column. Where space will not permit, or the subject is not suitable, letters will be personally answered, subject to proper limitations, and where a stamped addressed envelope is inclosed. Dr. Evans will not make a diagnosis or prescribe for individual diseases. Requests for such service cannot be ensured.

Second, Weber charges their stackings with being responsible for a skin disease of the ankles. This disease he calls erythema induratum or a reddening, thickening, scaling inflammation of the skin. It appears mostly on the outer side of the leg around and just above the ankles. It causes the skin to turn to a coppery red and to become thick and brawny and to scale. The thick, elephant hide patches may itch considerably. The condition is worse in winter and gets better in hot weather.

Dr. Weber attributes it to the habit of wearing thin stockings and low quartered shoes in winter. He thinks heavier foot and leg wear in cold weather should be worn to prevent this skin trouble.

This is a nerve-racking drive over steep hills, hairpin curves, narrow bridges, and end detour after another for about thirty

miles from Ottawa west. Three good routes are: 1. State highway 4 to Dwight, west on 17 to Wenona and Lacon, thence 29 to Peoria.

2. State highways 4 and 7 to Ottawa, thence south on 23 to Streator, west on 17 to Wenona and Lacon, thence 29 to Peorla. 3. State highways 4, 7, 23, 17

to Wenona, thence south on 2 to El Paso, thence west on 8 to Peoria.

All of these routes are shorter than the old Chicago-Peoria road and there are no hills of any consequence nor open pavement.

### "Music-And July Days"

TASTE in music often runs in sympathy with the seasons-like taste in colors. Brighter tints in costume, and brighter quality in musical programs are alike in favor in the summer season.

And every type of music in its turn reveals something more of the wonderful tonal range of the KIMBALL Piano. The sparkling brilliancy with which it strengthens the appeal of the lighter melodies is balanced by the grandeur that its volume and depth of tone impart to the statelier measures.

The marvel of KIMBALL quality is the growth of generations of experience and development. It is illustrated in every KIMBALL instrument-large and small grands, uprights, players and phonographs. And throughout these years of growth, the expansion of KIMBALL manufacturing resources has tended steadily in the direction of an impressive moderation in KIMBALL prices.

Come and hear a demonstration-and ask us about the KIMBALL "One Price Policy," under which every customer pays exactly the same price—plainly market on every instrument.

## Railroad Freight Rates-

It is generally conceded that if the country is to have private ownership of railroads they must be supported by the shipping and traveling public.

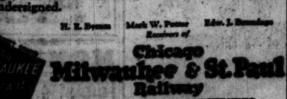

The returns from existing rates during the past few years have not been adequate to pay a fair return or even any return to the owners of many railroads. This is especially true of the roads of the northwest, of which the Chicago, Milwaukee & St. Paul Railway, now in receivership, is an important one.

An application for increased freight rates on western ads is now pending before the Interstate Commerce

The Receivers of the Chicago, Milwaukee & St. Paul Rallway have proposed and will advocate before the tate and Interstate commissions a new plan of rate naking by which a very small increase in freight rates in western railroads can be so distributed among them hat the maximum benefits can be given to weaker lines without unduly favoring the strong, prosperous roads.

The plan involves segregating the money produced by a small increase in freight rates on all western railmade and putting it into a common fund or pool and distributing the money to all the roads by which it is tarned in the ratio that each road failed during the preceding year to earn the 5½% on its property investment which the Transportation Act of 1920 allows. If this plan had been in effect during 1924 the Milwankee Road would probably have avoided a Receivership.

The Receivers of the Chicago, Milwankee & St. and Railway have not been able to secure the support of the other western railroads to their plan and, serefore, have decided to advocate the plan independently for the benefit of this property and as the lan which best solves the railroad problem with the west burden to shippers. For this purpose the serivers of the Chicago, Milwankee & St. Paul Rail-

### Financial "Hot Water" Is the Hottest

One of the queer things about people is how we hate to make the effort to get ourselves out of an uncomfortable situation after we're once used to the discomfort.

We put up with an awkwardly arranged house, a too-tight hat, a poor reading light, incompetent help, a squeaky door, a congested traffic system. We know these things can be remedied, some of them very easily, but to start the remedy requires effort, and so we say: "I must fix this tomorrow." But tomorrow keeps a long way off.

Many people are in a lot of financial dis-comfort more because they are not doing anything to make themselves comfortable than because they need be uncomfortable. They have got themselves into some careless habits of spending, and so although the income should be quite adequate, it never is, and there's nothing saved.

- If you are in financial "hot water" all the time, when you think that you really ought to be "easy," come in and let our Service Station go over your case with you. As we have to consider money affairs constantly, the chances are that we will be able to find the difficulty, and you will be able to spend with a better conscience, since you will be saving.

Notwithstanding the rain our big trip of last Sunday comprising 13 busses and carrying hundreds of people, was a tremendous success. We wish to take this occasion to apologize to scores of people whom we could not take because of lack of transportation on Sunday, July 19th. We expect to be able to provide twice as much transportation as we had last Sunday in order that everyone may be accommodated. However, it is absolutely essential that those who desire to go on this sight-seeing tour of the greatest industrial district of the world, should advise us promptly.

### Thrills and Profits in This Free Trip

Nothing is so inspiring as the sight of industrial expansion where millions of dollars are being spent and millions of dollars are being made. This District, unquestionably, will be greater than the great Pittsburgh district. Here, where rail and water transportation meet, a hundred thousand families will work and prosper. Here there will be at least 460,000 population, millions of dollars in pay rolls, hundreds of thousands of homes, tremendous property values, fortunes created over night, opportunities for investors, for business men, for those who seek employment, for everybody.

W. A. Colston, the Van Sweringen attorney, protested that there was "a patent error of \$16,000,000" in one column of the tabulation, drawing a retort from Mr. Anderson that every item "had been checked and made up from testimony in this case."

Mr. Anderson had outstanding when the hearing adjourned demands for the records and minutes of the boards of directors of the Pere Marquette, Erie, Chesapeake and Ohio, and Nickel Plate railroads touching the merger plan, and the records of the committee which now holds deposits of stock consenting to the merger.

in Bitter Debate.

Washington, D. C., July 22.—49—
Prospective profits for the Van Sweringen interests from consummation of the Nickel Plate railroad merger project formed the basis of a hotty disputed and temporary representation today before the interstate commerce commission.

In cross examining O. P. Van Sweringen, leader of the merger project, H. W. Anderson, counsel for protesting minority stockholders, produced a tabulation of original costs and potential values of converted railroad securities which he described over the witness warm protest as a "profit" summarization.

First Awards totaling \$52,450, approximately one-half the amount claimed as damages against the Chicago sanitary district, were made yesterday by the Illinois valley claims commission in a ruling on the first thirteen cases heard. There are about 700 claims for between \$7,000,000 and \$10,000,000 as a result of overflows in the Illinois valley. It is estimated that the commission will require the greater part of a year in hearing all the cases. Some claims are twenty five years old. The commission is composed of three downstate county judges—F. C. Carpenter (Winnebago), W. C. Radliff (McLean), and J. G. Van Keuren (McLean),

# "Social" Diseases Have No Favorites

Few people know the real facts about the so-called "social" diseases. A great many have the idea that respectable people don't contract them. They think of them only as diseases that afflict immoral people.

As every physician knows, venereal infections are found among all classes of people. Take any general crowd in a public placeon the street, at the beach, the amusement park or the theater, for example-and at least every fourth person in it has a "social" disease. (This figure is based on the percentage of men found infected when examined for military service during the warundoubtedly the most complete and accurate statistics ever gathered on these diseases. 27 infected men out of 100 was the average.) Dr. Bundesen, Health Commissioner for Chicago, has estimated that there are at least 250,000 fresh cases added every year in this city to those already existing.

"Social" diseases have no favorites. They are ready to work their ruin upon anyone into whose system their germs find entrance. Being highly infectious, they number thousands of victims aroung innocent people—not only men, but women and children.

You often hear of a "light case" that "doesn't amount to much" and is "nothing to worry about." A venereal infection should never be considered as "light." No diseases are more deceptive at certain stages and

under certain conditions than these. Every case should be regarded as very serious and should receive prompt and proper treatment. Nobody can let a "social" disease have its way and not pay the penalty.

Insanity, blindness, sterility, paralysis, locomotor ataxia, ulcerated tissues, rheumatism, and diseases of the genito-urinary organs are some of the troubles which result when these infections are allowed to go on unchecked. They kill at least 300,000 people every year in the United States.

No one need flatter himself that his is just a "light case" that will take care of itself or which he can cure with some nostrum. Such a person is simply laying up trouble for himself. Later on he may be numbered among the human wrecks who also had "light cases."

The vast majority of those whose health has been ruined or whose lives have been taken by "social" diseases could have avoided disaster if they had only realized the importance of getting the best of the disease before it got the best of them.

Both forms of venereal infection can be cured, but the earlier the treatment is taken the sooner will a cure be obtained and the less will be the chance of incurring permanent disability. Even people suffering from the results of delay can be helped by modern methods of treatment which may check the progress of the disease and prevent further damage to the system.

The Public Health Institute offers its services to anyone who has contracted or has been exposed to either of these infections. Those who come here receive the attention of trained physicians who give each case the treatment best adapted to its condition. As the Institute was organized not for profit, the fees are small and are uniform. All patients pay alike for the same service. No one is turned away for lack of immediate funds.

Possibly you have symptoms which at least justify an examination to determine whether or not you have become infected. Or one of these diseases may have appeared in an active and unmistakable form. In either case the Institute is here to aid you as it has aided thousands of others to recover their health. A visit now may save you from months or years of suffering and from permanent dis-

# CHICAGO UNION STATION

America's Finest Railroad Terminal

The Chicago Union Station Lines take pleasure in announcing the completion and placing in service of all facilities of their new Passenger Terminal at Jackson, Canal and Adams Streets.

In respect to both architecture and utility, the new station is one of the most impressive in the world. It forms the most important link yet realized in the Chicago "City Beautiful" plan, in harmony with which it was designed and constructed.

Conveniently located adjacent to the business district of the City, the Union Station is quickly reached by surface and elevated lines, taxicabs and boulevard busses. A short enclosed passageway connects the station directly with the Canal Street Station of the Elevated Railroad. Unusual facilities are provided for the quick dispatch of taxicab service. A broad private thoroughfare is provided along the east front of the

concourse building for the special use of patrons going to and from the station in their private automobiles.

In size it ranks among the three largest passenger terminals in America. To best serve the needs of the traveler, the ticket office, train concourse and platforms, waiting room, baggage room and shops are all on one level, being so arranged that steps and time are everywhere conserved.

The restaurants, lunch room, drug store, book shop and other shops in the station, virtually a city within itself, are all under the well-known Fred Harvey management.

The completion of the Chicago Union Station, notable and preeminent among the great passenger terminals of the world, marks a remarkable accomplishment from which Chicago and travelers from all other parts of America will derive untold benefit.

N SVERY food there lies a rich mine of flavor you notice. It needs an staide agent to bring it to tur taste.

One of these agents is pure mustard. Gulden's Mustard develops food's rich taste. It brings out full piquant flavor you never suspected.

Good housewives put Guiden's in sauces and gravies; they use it to give a dash to vegetables, serve it with hot meats. Keep it on the table beside your pepper and salt. Always fresh; always delistions.

Calls on Flock Held Pastor's Highest Duty

The calls the pastor makes upor the families of his flock are more important than sermons he preaches, according to 466 middle western ministers who have responded to a question-naire recently distributed by the de-partment of religious education at Northwestern university.

The least important duty, according

to these same ministers, Prof. George F. Betts found, is conducting revival meetings. Preaching takes only third place in importance, being graded below the importance of providing for competent instruction for children in the Sunday schools.

And this is only one model among many that are reminiscent of the bell pull. That long tassel often accents both the evening gown and the evening wrap of this season.

Of course, there is nothing new about the tassel. The only new thing is that it is still kept on after such years of faithful attendance, perhaps because there are so many garments which would look uncompleted with-out such touch! For example, the dinner frock sketched here would look like a play without a curtain, if it were not for the deep tassel of apricot colored silk that finishes a sort of ambassador sash of gold satin. This sash with its tassel gives cachet to a simple little straight line frock of apricot satin embroidered in an allover pattern of gold thread. The golden glint of the sash is found again in a foundation skirt of the same Both embroidery and beads are no

listance conversation with Dempsey well but is more of the type of fighter last night, and the substance of the than boxer.

It appears there is bad feeling between Bogash and Flowers. When the pair met in Boston, Tiger con-tinually butted the Connecticut fighter in the closing rounds. Manager Jo Smith and Bogash yesterday served notice on Matchmaker Mullen that i Flowers starts these tactics Bogash will butt the colored fighter all over the ring. Lou wants to fight clean but intends to resort to rough tactics if Flowers starts anything.
Flowers arrived in Chicago yester-

day but the fighter elected to taboo boxing. He took a long walk and will work out at the Mullen gymnasium this afternoon. Manager Miller asserted Tiger's fight last Monday night in Jack Doyle, Cub agent. Du Boston has left him in good shape and a gym workout today will fit him for and is hitting well. He is fast, and

There's a little bit of MURAD in nearly every cigarette ... But only a MURAD is ALL MURAD

What price cigarette perfection? Not much. Just a few cents more for all pure Turkish tobacco.

Nature itself has set this price. For reasons of her own, she elected to grow the finest cigarette tobacco under the turquoise skies of the Orient. It costs more to make cigarettes from this anointed leaf of a distant clime. But it returns an immeasurable dividend in increased smoking enjoyment.

Not all the chemistry of Man has been able to duplicate in any combination of substitute tobaccos the inimitable smoking

charm which Nature's chemistry has put into Turkish alone.

Domestic cigarette makers frankly concede this indispensability of Turkish when they add a sprinkling of Turkish to toneup and "sugar-coat" domestic blends.

But in MURAD you do not get a mere sprinkling of Turkish - Turkish is the whole body - the sum, and substance of the entire cigarette.

You can get a percentage of MURAD quality in many cigarettes. But only a MURAD is all MURAD. Only a MURAD is

### DAILY RACING FORM SELECTIONS

The two year old Cartoon, until a short time ago in Harry Payne Whitney's string, won the Drexel, and his stable year old maiden allowance affair,

which opened the program.
Cartoon's victory was entirely
worthy of a stake triumph, for the
ex-Whitney youngster won much as
he pleased by five lengths, covering
the six furlongs in the good time of
1:13 2-5. Back in second place was
the T. J. Pendergast filly, Nettle
Sweep, backed to the exclusion of
others, while Sallies Hour got the
short end of the spoils.

It was another ideal day for racing and the return of good track conditions brought a noticeable improvement in the racing. A big crowd watched the card decided. The double victory of the Dearborn stable also brought back into good riding trim the young-ster C. Allen, who had a leg up on both the winners and had to outride some of the best jockeys here; until a few days ago he was on the ground under suspension.

REORGANIZATION OF

## Chicago, Milwaukee and St. Paul Railway Company

The time for the deposit of securities under the Plan and Agreement dated June 1, 1925, for the Reorganization of Chicago, Milwaukee and St. Paul Railway Company has been extended to and including September 15, 1925.

I. The deposits of securities to date indicate a very encouraging support of the Plan by security holders. It was only shortly before the expiration of the time originally fixed for deposits that the New York Superintendent of Insurance and the New York Superintendent of Banks gave their consent to deposits by insurance companies and savings banks by whom large amounts of the bonds are held, and many security holders have doubtless been influenced by the general knowledge that the period first fixed for deposits under any reorganization plan is invariably extended.

The discussion of the proposals of those who counsel delaying reorganization pending the outcome of efforts to secure increased freight rates for the western carriers and an extension of the \$55,000,000 of notes held by the Government, which at first seemed to confuse the issues, has, in the end, been helpful in that it has been made clear that there are no advantages to be gained from delaying reorganization that are comparable to the manifest advantages of a

II. There can be no possible gain from a mere extension of the Railway Company's debt to the Government (as distinguished from the funding of that debt into long term obligations) inasmuch as a continuation of that debt as a short term obligation would be a constant drag upon the new company's credit and would seriously weaken its financial structure, since there would be no certain method of providing for the debt except by the sale of bonds which, under the present Plan, are reserved for future capital requirements. The Bondholders' Committee, whose members represent insurance companies, savings banks and individuals who are largest holders of the Railway Company's bonds, is unalterably opposed to any plan which contemplates the mere extension of the Government debt.

To await the outcome of a possible further effort to fund the Government To await the outcome of a possible further effort to fund the Government debt into long term obligations would be equally fruitless. Considering the value of the collateral held by the Government, there is no ground for hoping that the efforts of the proponents of the policy of delay would be more successful than the efforts heretofore made to induce the Government to fund its debt into long term obligations which would meet the requirements of the Bondholders' Committee that such obligations must be junior in rank to the bonds created to provide for future capital requirements, and be taken at their full principal amount and at a rate of interest not exceeding five per cent. per annum.

It is therefore clear that delay in reorganization until the outcome of a further effort to deal with the Government debt would be futile.

III. There can be no difference among security holders as to the importance of making every possible effort to secure an increase in rates for the western carriers and for the Chicago, Milwaukee and St. Paul System in particular. That the Receivers intend to spare no effort to that end is shown by their recent retention of Hon. Charles E. Hughes to represent them in rate proceedings. There is, however, no sound reason for delaying reorganization pending the outcome of the efforts to secure a rate increase. On the contrary every

1. There is no assurance as to how soon an increase in rates will be

2. Delaying the reorganization will in no way aid or hasten the effort to obtain higher rates.

3. An increase in rates would not make it advisable to modify the present Plan of Reorganization for it would clearly be unwise to reorganize the Chicago, Milwaukee and St. Paul System under any financial structure which would not enable it to survive, without receivership, a years. It must be remembered that for the four years ended December 31, 1924, the Railway Company failed to earn its fixed charges by an average of over \$5,000,000 a year, and if effect were given to the increased rates for depreciation of equipment and certain other items as recommended by Coverdale & Colpitts the deficit would have been substantially larger. Moreover it is essential to a sound reorganization that the new company be provided with a financial structure under which it will be able to finance future capital expenditures and refund underlying bonds

the lowest possible cost,
4. The Plan assures that the security holders will fully participate in their relative order of priority in any benefits obtained through an increase of rates or other favorable developments. In this connection, spedatory that each year all available net income be applied to the payr of the interest, and, beginning 1936, to the sinking fund upon the new Adjustment Bonds (except that the Board of Directors may set aside not to exceed one-half of the first \$10,000,000 of such available net income for exceed one-half of the first \$10,000,000 of such available net income for defined expenditures, chiefly for capital account) and that until the expiration of the five-year period after which interest upon the Adjustment Bonds becomes cumulative, the Board of Directors of the new company will be elected by Voting Trustees of whom a majority will represent the Adjustment Bonds. On the other hand so long as the receivership continues the entire income of the property not required for interest on underlying bonds will undoubtedly be devoted to capital expenditures and thus be diverted from the payment of interest on the junior bonds.

thus be diverted from the payment of interest on the junior bonds.

IV. It will thus be seen that the advantages claimed for delaying reorganization will not stand analysis, while the advantages of a prompt reorganization and an early termination of the receivership are manifest. Among those advantages are: (1) avoiding the damage to the goodwill of the property inevitably involved in a prolonged receivership; (2) avoiding a continuance of the heavy current expense incident to receivership; (3) avoiding the increased cost of financing capital expenditures which could be financed at a lower cost by the new company with reestablished credit than would be possible during a receivership; (4) avoiding the loss due to continuance of the Government debt at six per cent. interest; (5) avoiding the reduction in the amount of earnings available for interest upon the bonds which the foregoing and other losses incident to receivership would entail; and (6) hastening the time when the earnings of the property will become available for current distribution among the security holders.

argument favors an early reorganization. Accordingly all holders of the bonds and stock specified below are urged in their own interest immediately to deposit their

securities under the Plan. Application is about to be made to the New York Stock Exchange for the listing of the Certificates of Deposit. Copies of the Plan and Agreement of Reorganization may be obtained from any of the depositaries or sub-depositaries or from the Reorganization Managers.

As of April 30, 1925, there were outstanding in the hands of the public, not exceeding 160 shares of No Par Value Common Stock, \$1,999,000 Par Value of Common Stock, \$7,868,600 Par Value Preferred Stock, and \$27,095,000 Par Value Funded Debt of subsidiary and leaved common leaves.

SECURITY: The Twenty-Year 6% Secured Gold Bonds, of which \$6,750,000 will presently be outstanding, will be the direct obligation of National Electric Power Company and will be specifically secured by pledge with the Trustee of approximately 99½% of the outstanding Common Capital Stock of the Cumberland County Power & Light Company, and all of the outstanding Common Capital Stock (except Directors' qualifying shares) of the Northwestern Public Service Company, Kansas Electric Power Company and Southwest Power Company.

The reproduction cost new, less accrued depreciation, of the properties of these com-panies applicable to the securities pledged panies applicable to the securities pledged under this mortgage, based on appraisals by independent public utility engineers and appraisers, is very largely in excess of the total amount of these bonds to be presently outstanding. These bonds will be followed by \$3,500,000 par value of 7% Cumulative Preferred Stock, 140,000 shares of Class A Stock, and 280,000 shares of Class B Stock and 280,000 shares of Class B Stock.

CONSOLIDATED EARNINGS: For the twelve months ended April 30, 1925, the con-solidated earnings of the subsidiaries, including those to be acquired, of National Electric Power Company, as determined by independent auditors, a copy of whose certificate is available upon request, were as follows:

Operating Expenses, Maintenance, Taxes, including Federal Taxes, Amortization and Depreciation computed as defined in such auditor's certificate

### Two men on the same errand

ONE is president of a wellknown manufacturing concern. After appraising Miller First Mortgage Bonds by every test known to the experienced business man, he made an initial investment of \$25,000.

The other is a working man who wisely lays aside each week a portion of his wages. His first purchase was \$500. Since that time he has invested \$2500 in Miller offeringsand continues to save by this means year by year.

## Current Miller offerings give unusual opportunities for reinvestment

man appraise Miller Bonds from different points of view. But each desires the maximum return on his money consistent with true security. Each wants an investment unaffected by the "ups and downs" of the market. Each is laying the basis for personal financial independence.

At this time of year, particularly, the business man looks for satisfactory investments because he has funds released by maturing bonds and interest payments. He considers more carefully, today, his list of securities. He is anxious to weed out unsatisfactory and miscellaneous holdings.

Similarly, the working man or the salaried man who has been practising thrift at a low interest rate appreciates the chance for larger earnings.

qualities which any real investor ing interest up to 7 per cent.

The business man and the working wants. A record of never a loss to any investor. Interest up to 7 per cent. Normal federal income tax refunded. Various state taxes refunded or paid. Genuineness of each bond certified by a bank. Denominations \$100-\$500 **-**\$1000.

> Many issues of Miller Bonds are now available for reinvestment purposes. Each is secured by a first mortgage on an independently appraised hotel or apartment or office building in widely separated cities. Current offerings are headed by the outstanding first mortgage bond issue of the year-\$4,500,000, secured by the Hurt Building at Atlanta, Ga., sixteenth largest office building in America. # You Can Have What You Want Through a Tribune Want Ad!

"GET what you want, young man, or soon you will begin to like what you get," says Bernard Shaw in one of his famous plays. And this sage advice applies to everyone. Not everyone is satisfied with the same thing. Each person knows what he wants. If you do not see exactly what you want among the hundreds of Want Ads appearing daily in The Tribune, then advertise your want. Then you will be able to choose the best of several offers.

The Tribune Want Ad Section is a great sales agency—a commodity exchange without peer. It reaches the most prosperous, most energetic people in Chicago and its neighboring states. If you have anything of value to sell, it will carry your offer, straight and true, to your logical prospects.

The Tribune has one of the largest newspaper circulations in the world-645,000 daily and 1,042,000 Sunday. Chicago and the five states of Illinois, Indiana, Iowa, Michigan and Wisconsin are one of the richest agricultural and manufacturing areas in the world. The Chicago Tribune blankets this area.
